Few of us would contemplate making a major transformation to our most prized possession, our home, without an assurance of quality workmanship and of the materials used. We place a premium on quality and customer satisfaction.

Awning Windows

AWNINGS WINDOWS

Awning Windows have always been popular with New Zealanders and are appropriate for both modern and traditional architecture. The traditional design has been improved with smooth curves, stylish contours and enhanced practicality.

SLIDING & STACKER WINDOWS

Sliding & Stacker Windows allow for non-intrusive openings onto decks and walkways. The elimination of the protruding window makes walkways and play areas safe environments. Sliding & Stacker windows have been very popular over a bench or sink as it reduces the risk of strain when reaching to open and close them.

Corner Sliding Windows

Corner Sliding Windows

Casement Windows

CASEMENT WINDOWS

Casement Windows operate in the same capacity as awning windows although hung vertically. They are ideal for directing breezes internally for optimum ventilation.

Bifold Windows

BIFOLD WINDOWS

Bifold Windows can enhance the indoor-outdoor flow of your home. They fold easily and elegantly to maximize your living spaces. Bifold windows have a cleverly designed top hung roller system.

This system allows for the option of a flat surfaced sill. The optional flat surfaced sill provides a more aesthetically pleasing look and eliminates the bottom track for dirt, sand and debris to get trapped.

ARCHITECTURAL WINDOWS

Arched Windows

Aluminium is one of the most versatile resources on the planet. Our unique extrusion can be bent and mitred to produce the finest arched and circular windows on the market. These windows can be customised to fit your desired opening.

Corner Windows

The butt-joint feature allows for corner windows to provide a panoramic view of the surroundings. Add a sense of light to your interior with a corner butt-joint window.

Raked Windows give your home that distinctive look. Custom design your window frame with architectural features and step into a world of contemporary design.

Aluminium Liner Windows

ALUMINIUM LINER WINDOWS

Aluminium Liner Windows are one of NuStyles most popular products. It is the most affordable and straightforward timber window replacement option, whilst minimising disruption to the original frame. Developed and perfected over 34 years of trading has made aluminium liner the best solution for upgrading timber windows.

Cedar Louvre Windows

Bay Windows

LOUVRE WINDOWS

Louvre Windows allow you to control the amount of light and air that passes through your home by manually adjusting the overlapping blades. They are the best selection for providing ventilation and maintaining airflow while preventing rain from entering your home. NuStyle Louvres are available in aluminium, glass or cedar allowing you to make the perfect choice.

GREENHOUSE & BAY WINDOWS

Greenhouse Windows maximise light and warmth with glass roofs and 90 degree corners. The wide sill allows you to grow plants or display home accessories.

Bay Windows bring light and a feeling of spaciousness to homes. They expand the view from any room. They are the ideal solution for homes with limited space.

Greenhouse & Bay Windows can be modified to fit awnings for more ventilation without changing the overall design or effectiveness of the window. The options are endless.
